OBJECTIVES

Computer Science student (intership seeker from May 2027 - Disember 2027) specializing in Data Analytics with a strong foundation in Python, SQL, and Microsoft Power BI. Adept at transforming complex datasets into actionable visualizations and strategic insights. Ready to leverage rigorous technical problem solving skills to help organizations optimize their data-driven decision making.

EDUCATION

Universiti Teknologi PETRONAS (UTP), Present (until 2028)

Foundation in Computer Science - CGPA : 3.72
Bachelor of Computer Science Hons - CGPA : 3.78

SKILLS

Programming (intermediate)
- Python
- Java
- C++

Data/Tools
- SQL
- Power BI
- Excel

Concepts
- Data Analysis
- Machine learning
- Predictive Maintenance

Soft Skills
- Problem Solving
- Analytical Thinking
- Team Collaboration

PROJECTS & TECHNICAL EXPERIENCE

Data Analysis Project: Malaysia's Labour Force Gap in Data challenge Competition UKM

- Developed an **interactive data dashboard** and executed an Extract, Transform, Load (ETL) process to visualize longitudinal trends in the **Malaysian labor market from 1982 to 2021**.
- Identified a tertiary unemployment gap and proposed data-driven policies such as micro-credentialing and decentralized job creation to align talent with industry demands.

Investment Company Relational Database System

- Architected a comprehensive relational database schema consisting of **36 primary tables and 48 associative explosion tables**, establishing strict data types, integrity constraints, and primary/foreign key relationships.
- Formulated complex **SQL statements**, including advanced up to 8-table joins and custom views, to extract cross-departmental business intelligence for HR, legal, and executive management reporting.

Data Analysis Certification of AI and Machine Learning from Nexpert Academy

- Executed comprehensive exploratory data analysis (EDA) and data wrangling using **NumPy, Pandas, Matplotlib, and Seaborn** to clean, visualize, and optimize datasets for predictive modeling.
- Developed and trained diverse supervised and unsupervised machine learning models **(Linear/Polynomial/Logistic Regression, K-Means Clustering)** and deployed interactive, data-driven web applications using **Streamlit, Pickle, and GitHub.**

Elemental Quest (Turn-Based RPG) Game

- Built a turn-based RPG using **C++ and OOP principles** to drive dynamic character progression, scaling enemies, and multi-phase boss fights.
- Implemented strategic rock-paper-scissors elemental combat, an in-game economy, and a dynamic inventory system for resource management.

SmartConnect (AI Mentor-Startup Management System) at Build with AI Kuala Lumpur 2026

- Developed a full-stack platform using **React, Node.js, and Firebase Firestore**, integrating **Google Gemini** to extract structured startup profiles from pitch decks and onboarding forms.
- Engineered an **AI matching engine** that scores mentor-startup alignment with explainable reasoning, while tracking venture success metrics (funding, revenue) to continuously refine recommendations.

DigitAlert (AI-Powered Whistleblowing & Incident Platform) for PETRONAS in SecureNext Hackathon

- Developed a cross-platform application using **Flutter and Dart**, integrating an AI engine that automatically structures raw reports, assigns risk priorities, and routes cases to the appropriate departments.
- Built a real-time analytics dashboard backed by **Google Cloud databases**, featuring live incident tracking and automated summaries to accelerate decision-making and response times.

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Runner Up in AWS x GenAI Hackathon 2026
- Certification of AI and Machine Learning from Nexpert Academy
- Silver Award in MALAYSIA-JAPAN INTERNATIONAL CONFERENCE (MJIC) on Nanoscience, Nanotechnology, and Nanoengineering 2026
- Secured 9th place out of 24 teams in the Oh My Code (OMC) Competition 2025.

LEADERSHIP EXPERIENCE

Head of Media Department of Google Developer Student Clubs (GDSC UTP) *Sept 2026*

- Directed daily media operations and managed cross-functional creative teams, overseeing the end-to-end production of multimedia campaigns from conceptualization to final delivery.
- Execute strategic media initiatives, ensuring strict brand alignment and optimizing content performance across all targeted channels.

Asst. Head of Video Department of Orientation Week (OWEEK) May 2026 (UTP) *May 2026*

- Collaborated with the event committee to plan, shoot, and edit official orientation videos for new students.
- Operated video equipment and software (e.g., cameras, lighting, Adobe Premiere Pro / Davinci Resolve) to ensure high-quality production.

Project Leader of Oh My Code (OMC) Project (UTP) *May 2025 - July 2025*

- Led a team of 7 members to design and develop an application aimed at empowering income generation through digital solutions.
- Oversaw project planning, task delegation, and technical development using Visual Basic
- Delivered a structured presentation to competition judges, showcasing the app's features, business model, and potential impact.
